Why Customers Love Us

★★★★★ 5 out of 5

"Started using this only from last few weeks. I like the returns, that too with little/no time and effort invested. With great Transparency. Received quick support whenever needed."

Kiran Mamidipalli, TradersPost Customer Review

★★★★★ 5 out of 5

"Best platform for algorythmic trading. Traderspost takes the struggle out of having to code API's to each broker and having consolidated subscriptions with extra rulesets based on the subscription preferences makes this top dog from all other platforms used. Easily integrate signals from any webhook such as python, tradingview, trendspider, etc.. Customer service is fast and always on the spot although honestly there have really been no issues and has been a very stable and reliable platform. I'd be in a coding zoo mess without this as well as no ability to indirectly share my algos in realtime."

Jonathan Haggas, TradersPost Customer Review

★★★★★ 5 out of 5

"Very easy to use, has every setting you need. And it handles futures! Excellent documentation and good support."

Sjoerd van der Galie, TradersPost Customer Review

★★★★★ 5 out of 5

"Trading the US market from Australia is hard enough with out battling the time difference. Traders post has allowed me to run my strategy on autopilot and get some sleep while making some money. John has been helpful and always available if I have had any queries, the system itself is ready to use too. Highly recommend and look forward to seeing what future developments are added."

Tim Farquhar, TradersPost Customer Review

★★★★★ 5 out of 5

"TradersPost is a great software to automate your trading strategy. The user interface is intuitive and easy to use. The best part is you're able to join a community of like-minded individuals."

Anthony, TradersPost Customer Review

★★★★★ 5 out of 5

"Jonathan did a great job with TradersPost and is constantly looking for ways to improve the service!"
